

Please remove these guides
before supplying for print.

Bleed Area: Ensure your design fully extends into this area to avoid unwanted white edges once printed and cut. This section will be trimmed after printing.

Cut Line: This dashed line indicates where your design will be cut. Avoid placing important text or graphics here, as they may be trimmed during the cutting process.

Safe Area: This is 3mm inside the cut line. Place any important text or graphics within this area to ensure they won't be cut off.

Fold line
